Professional Summary

Senior Backend & Full Stack Engineer with a background in Environmental Engineering and over 5 years of professional experience in software development. Skilled in building and maintaining scalable web applications using TypeScript, Node.js, FastAPI, React, Next.js, React Native, TailwindCSS, and Python. Experienced with relational databases (PostgreSQL, SQL), ORMs (Sequelize, TypeORM, SQLAlchemy), API integration, LLM-powered systems (Claude API with tool-use and structured outputs), and cloud deployments (AWS, GCP, Cloud Run, Railway, Vercel). Contributed to platforms across the real estate, automotive, pet health, fintech, and data analytics sectors.

Skills

Languages:	TypeScript, JavaScript (ES6+), Python (async), SQL
Front-End:	React.js, Next.js (App Router), React Native, TailwindCSS, HTML/CSS
Back-End:	Node.js, FastAPI, Express, GraphQL, REST APIs, Pydantic
AI / LLM:	Claude API, LLM tool-use & structured outputs, prompt engineering, document extraction
Databases & ORM:	PostgreSQL, Redis, SQLAlchemy 2.0, Sequelize, TypeORM, Alembic
DevOps & Cloud:	AWS, GCP, Cloud Run, Vercel, Railway, Docker, GitHub Actions (CI/CD)
Testing & Security:	pytest, Jest, Playwright, JWT, RBAC, AES-256-GCM
Tools:	Git, Swagger, Power BI
Languages:	English (Advanced), Portuguese (Native)

Professional Experience

Max Vitaly

Software Engineer | Jan 2026 – Present

- Built and maintained back-end endpoints for pet health insurance plan management, pet registration, and payment processing.
- Integrated external APIs and developed technical documentation with Swagger.
- Created unit tests to ensure feature reliability.
- Deployed and managed applications on Railway and AWS.
- Contributed to front-end development using React.js, Next.js, and TailwindCSS.

Hologram

Senior Software Engineer | Dec 2025 – Present

- Designed and built a full-stack internal SaaS for bank and credit card reconciliation against an external ERP system, with an async FastAPI backend (SQLAlchemy 2.0, PostgreSQL, Pydantic v2) and a Next.js 14 frontend (App Router, TypeScript strict).
- Architected an LLM-powered extraction pipeline using the Claude API with tool-use and structured outputs to parse bank statements and credit card invoices into structured transactions, with a deterministic matching engine handling value and date tolerance and anomaly detection.
- Implemented security-first data handling: field-level AES-256-GCM encryption, JWT authentication with RBAC and per-client access control, and structured-log redaction.
- Containerized and deployed services to Google Cloud Run via GitHub Actions CI/CD, with automated quality gates (ruff, mypy strict, pytest, pip-audit) and property-based testing.
- Built and maintained large-scale data extraction pipelines and automations on Google Cloud Platform (GCP), structuring data to feed analytical dashboards built with Power BI by the data team.

Minha Casa Construída LTDA

Senior Backend Engineer | Mar 2021 – Jul 2026

- Built and maintained back-end endpoints for the real estate platform, handling business logic and database operations.
- Integrated external APIs and developed detailed documentation with Swagger.
- Created unit tests to validate and ensure feature reliability.
- Contributed to front-end development using React.js, Next.js, and TailwindCSS.
- Deployed and managed projects on Vercel, ensuring stability and scalability.
- Supported AWS cloud integration for system resources.

Riderauto

Front-End Engineer (Contractor) | Feb 2023 – Apr 2025

- Developed a web platform for selling used cars using React.js, Next.js, and TailwindCSS.
- Focused on responsive design and user experience improvements.

- Collaborated closely with the company team to align technical solutions with business requirements.

Cubos Academy

Technical Interviewer | Dec 2022 – Aug 2023

- Conducted technical interviews for B2B scholarship selection processes with partner companies.
- Reviewed and analyzed JavaScript code submitted by candidates.
- Evaluated technical capabilities and provided detailed feedback.
- Contributed to the selection of promising candidates for the programs.

Brazil Iron Mineração LTDA

Procurement Analyst (Buyer) | Feb 2020 – May 2020

- Managed supplier relations, negotiation, and purchasing of mining supplies.
- Performed cost management and analysis of supply expenses using Excel.
- Conducted quotations and negotiations for services and equipment.
- Controlled purchase orders and validated invoices.

Education

- **Full Stack Software Development** – Cubos Academy | Feb 2022 – Oct 2022
- **Environmental Engineering** – Universidade Tiradentes | Jul 2014 – Nov 2019
